WORK EXPERIENCE

Developer Soft and Technical Support Sea Inc. **June. 2024 - June 2026**
Jr. Support Developer III *Pasig City*

- Analyzed customer requirements and resolved complex technical issues involving **DevExpress** components across desktop and web platforms, including the development of custom code examples and sample projects.
- Developed deep expertise in charting, mapping, and Office-related APIs and technologies, with a strong understanding of the underlying architecture, feature nuances, and implementation required to deliver effective solutions and support.
- Participated in beta testing of new product components and features, with a focus on Microsoft Office-related technologies such as Rich Text (RTF), Spreadsheet, and PDF processing. (**Office File API**).
- Utilized GitHub, Trello, and MS Teams to document findings, communicate issues, track tasks, and collaborate effectively with team members.
- Consistently achieved strong performance metrics across multiple product catalogs for handling customer support tickets and technical inquiries.

TE3D House – AdRIC Research Center **Sept. 2023 - Dec. 2023**
Dialogflow Developer *Manila City*

- Designed and developed chatbot applications in collaboration with different teams to integrate features from their respective scope.
- Developed a multilingual chatbot web application using **Google Dialogflow**, where users can engage in natural-language conversations across multiple languages. Built and integrated with Next.js and Python.

Eastworld Sales Philippines **Apr. 2019 - Aug. 2019**
Clerical Worker *Malabon City*

- Encoded and processed purchase orders..
- Supported colleagues by efficiently managing administrative tasks including data entry, organizing files, and utilizing software such as Microsoft Office suite to enhance office productivity.
- Optimized a business process that accounts for inventory returns with Excel.

EDUCATION

De La Salle University Manila **May, 2024**
BS in Computer Science, Major in Software Technology *Manila City*

Chiang Kai Shek College **May, 2019**
Senior Highschool Diploma STEM Graduate *Manila City*

PROJECT WORK

Symptom Checker Chatbot Co Developer
Telehealth Multilingual Chatbot *https://github.com/stevencastro31/symptom-checker-chatbot*

- Developed the chatbot with JavaScript, TypeScript, Express, Firebase, Dialogflow, and Meta Developer API.
- Chatbot converses in English or Tagalog related to Cardiovascular or Pulmonary symptoms and presents a level of triage on their conditions.
- Utilized webhooks for setting communications between the chatbot server, Dialogflow Cloud, and Meta APIs.

- Dedicated scripts for writing, fetching and updating dialogues stored on Firebase Database.
- Chatbot is interfaced through Facebook Messenger.

Hornet's Calculator Solo Developer
Damage Analysis Tool for Hollow Knight: Silksong *https://github.com/stevencastro31/the-hornets-calculator*
- Used TypeScript, Svelte 5, SvelteKit, and Tailwind CSS to build the front end.
- Developed an interactive, game-inspired loadout UI for equipping and customizing tools and skills.
- Built a damage dashboard UI that calculates and displays damage based on equipped tools, skills, and effects.
- Implemented a search and filtering feature to browse in-game enemies by type, name, or health.
- Deployed with Github Pages.
- Hosted at: https://stevencastro31.github.io/the-hornets-calculator

HuaWen Capture Solo Developer
Screen capture tool for translating Chinese locally *https://github.com/stevencastro31/hua-wen-capture*
- Built the desktop application using C# and WinForms.
- Supports Chinese and English text OCR for text extraction and analysis.
- Utilizes a local Neural Machine Translation (NMT) model with ONNX Runtime to translate Chinese text into English.
- Provides configurable settings, including the capture directory, screenshot hotkey, and launch options.
- Includes search functionality for looking up word definitions in a Chinese dictionary from CC-CEDICT.

Developer Portfolio Solo Developer
Personal Web Portfolio *https://github.com/stevencastro31/stevencastro31.github.io*
- Used JavaScript, Svelte5, SvelteKit, TailwindCSS for building the front-end.
- Developed animated cards for interactive information displays.
- Deployed with Github Pages.
- Hosted at: https://stevencastro31.github.io

Deep Sea Explorer Co Developer
Computer Graphic Elective Final Project *https://github.com/MangoCheesecake31/Final-Project*
- Used C++ and OpenGL to build the project.
- Features a controllable fish character piloted with mouse and keyboard, includes 8 unique deep sea creatures model that roams around the deep sea skybox. The mouse controls the camera orientation while the keyboard controls character movement.
- Utilizes numerous concepts of computer graphics such as textures, materials, lighting, shaders, camera perspectives, and camera controls.

Seven Discord Bot *Solo Developer*
Personal Discord Music Bot *https://github.com/MangoCheesecake31/Seven-Discord-Bot*
- Used Discord Developer Portal, Java Discord API, and LavaPlayer in building the bot.
- Plays audio from Youtube and has its own queue system.
- Supports Youtube & Spotify playlists.
