SUMMARY

Software developer with 2 years of experience in C#/.NET and TypeScript, building desktop and web applications and troubleshooting complex issues in production-grade component libraries. Built a multilingual chatbot, an offline OCR translation app, and static web pages.

TECHNICAL SKILLS

- **Proficient**: C#, C, Java, JavaScript, TypeScript, Python, NodeJS, TailwindCSS, Git, HTML, CSS, MySQL, Express, Svelte, WPF, WinForms, .NET, DevExpress, Visual Basic, Firebase, Dialogflow
- **Familiar**: React, SvelteKit, C++, OpenGL, NextJS, DiscordJS, Java Discord API, Google Cloud Platform, Google App Script, Android, MongoDB, Prolog, Meta API, PHP

WORK EXPERIENCE

Jr. Support Developer III **Jun 2024 - Jun 2026**
Developer Soft and Technical Support Sea Inc. *Pasig City*

- Served as the primary support developer for the mapping and charting product catalogs, handling the majority of ticket volume while consistently meeting team performance metrics.
- Resolved complex technical issues in **DevExpress** components across desktop and web platforms, handling on average 30 tickets per week to customer satisfaction.
- Built custom code examples and sample projects to reproduce, diagnose, and resolve customer issues in charting, mapping, and Office File API products.
- Beta-tested new Office-related components (Rich Text, Spreadsheet, PDF processing) and documented findings for the product team.
- Used GitHub, Trello, and MS Teams to track tasks and collaborate.

Dialogflow Developer **Sep 2023 - Dec 2023**
TE3D House — AdRIC Research Center *Manila City*

- Built a multilingual chatbot web application with **Google Dialogflow**, Next.js, and Python, supporting natural-language conversations across multiple languages (English & Tagalog).
- Worked with different teams to integrate features from their respective scopes.

Clerical Worker **Apr 2019 - Aug 2019**
Eastworld Sales Philippines *Malabon City*

- Processed purchase orders and optimized the inventory-returns process using Excel.

EDUCATION

De La Salle University Manila **May 2024**
BS in Computer Science, Major in Software Technology *Manila City*

Chiang Kai Shek College **May 2019**
Senior High School Diploma STEM Graduate *Manila City*

PROJECT WORK

Symptom Checker Chatbot Co Developer
Telehealth Multilingual Chatbot *https://github.com/stevencastro31/symptom-checker-chatbot*
Tech: NodeJS, TypeScript, Python, Express, Firebase, Dialogflow, Meta Developer API.
- Built a Facebook Messenger chatbot that converses in English or Tagalog about cardiovascular and pulmonary symptoms and presents a triage level.
- Implemented webhooks connecting the chatbot server, Dialogflow Cloud, and Meta APIs, plus scripts to manage dialogues in Firebase.

Hornet's Calculator Solo Developer
Damage Analysis Tool for Hollow Knight: Silksong *https://github.com/stevencastro31/the-hornets-calculator*
Tech: TypeScript, Svelte 5, SvelteKit, Tailwind CSS.
- Built an interactive, game-inspired loadout UI and a damage dashboard that calculates damage from equipped tools, skills, and effects.
- Added search and filtering of enemies by type, name, or health; deployed on GitHub Pages.
- Hosted at: https://stevencastro31.github.io/the-hornets-calculator

HuaWen Capture Solo Developer
Screen capture tool for translating Chinese locally *https://github.com/stevencastro31/hua-wen-capture*
Tech: C#, Windows Forms, .NET, ONNX Runtime.
- Built a desktop app that extracts Chinese and English text via OCR and translates Chinese to English offline using a local Neural Machine Translation model.
- Added word-definition lookup from CC-CEDICT and configurable settings (capture directory, hotkey, launch options).

Developer Portfolio Solo Developer
Personal Web Portfolio *https://github.com/stevencastro31/stevencastro31.github.io*
Tech: TypeScript, JavaScript, Svelte 5, SvelteKit, TailwindCSS.
- Built and deployed a static portfolio site with animated, interactive cards on GitHub Pages.
- Hosted at: https://stevencastro31.github.io

OTHER PROJECT WORK

Deep Sea Explorer Co Developer
Computer Graphic Elective Final Project *https://github.com/MangoCheesecake31/Final-Project*
Tech: C++, OpenGL, GLSL.
- Built an interactive 3D scene where a fish character is piloted by keyboard (movement) and mouse (camera) through a deep-sea skybox with 8 unique creature models.
- Applied core graphics concepts: textures, materials, lighting, shaders, camera perspectives, and camera controls.

Seven Discord Bot *Solo Developer*
Personal Discord Music Bot *https://github.com/MangoCheesecake31/Seven-Discord-Bot*
Tech: Java, Java Discord API, Discord Developer Portal, LavaPlayer.
- Built a Discord bot that plays YouTube audio in server voice chats, with its own queue system.
- Added YouTube and Spotify playlist support.
