PROJECT WORK

Seven Discord Bot

Solo Developer

Personal Discord Music Bot

<https://github.com/MangoCheesecake31/Seven-Discord-Bot>

- Used Discord Developer Portal, Java Discord API, and LavaPlayer in building the bot.
- Plays audio from Youtube and has its own queue system.
- Supports Youtube & Spotify playlists.

Deep Sea Explorer

Co Developer

Computer Graphic Elective Final Project

<https://github.com/MangoCheesecake31/Final-Project>

- Used C++ and OpenGL to build the project.

Last Updated: 06/15/2026

- Features a controllable fish character piloted with mouse and keyboard, includes 8 unique deep sea creatures model that roams around the deep sea skybox. The mouse controls the camera orientation while the keyboard controls character movement.
- Utilizes numerous concepts of computer graphics such as textures, materials, lighting, shaders, camera perspectives, and camera controls.

Developer Portfolio

Solo Developer

Personal Web Portfolio

<https://github.com/stevencastro31/stevencastro31.github.io>

- Used JavaScript, Svelte, SvelteKit, TailwindCSS for building the front-end.
- Has a custom animated cursor.
- Deployed with Github Pages.
- Hosted at: <https://stevencastro31.github.io>

Symptom Checker Chatbot

Co Developer

Telehealth Multilingual Chatbot

<https://github.com/stevencastro31/symptom-checker-chatbot>

- Used JavaScript, TypeScript, Express, Firebase, Dialogflow, and Meta Developer API for building the chatbot.
- Chatbot converses in English or Tagalog related to Cardiovascular or Pulmonary symptoms and presents a level of triage on their conditions.
- Utilization of webhook for setting communications between the chatbot server, Dialogflow Cloud, and Meta APIs.
- Dedicated scripts for writing, fetching and updating dialogues stored on Firebase Database.
- Chatbot is interfaced through Facebook Messenger.
